

Ideal Jacobs offers a wide range of gaskets, pads and elastomeric components for demanding application requirements in medical, electronics and telecommunication industries.

Our experienced product engineers could provide suggestion regarding material selection and product application to fulfill your complex needs.

Process:

- Die Cutting
- Stamping
- Slitting
- Laminating
- Laser Cutting
- Grinding

Application:

- Sealing
- Cushioning
- Vibration
- Sound Absorbing
- Filter
- Heat Insulation

Sponge & Foam Materials:

- Neoprene Blend
- EPDM
- PVC Nitrile
- EVA
- PE-Cross linked
- Polyester Polyurethane
- Polyether Polyurethane
- Urethane
- Vinyl
- Silicone
- Basotect
- Felted Wool

Rubber Materials:

- Buna-N
- EPDM
- Neoprene
- Nitrile
- Santoprene
- SBR
- Silicone
- Thermoplastic Urethane

Material Partners:

- Rogers Poron Material and Bisco Silicones
- Saint Gobain Performance Plastics
- Rubberlite Incorporated
- Armacell
- Foamex
- Wm.T. Burnett Co.
- BASF
- 3M
- Adchem
